

5000

Code 10730204

Air purifier filter with pressure regulator and gauge.
Semi automatic drain.
High resistance and protection new cup.
Minimum pressure drop.

5100

Code 10730202

Air purifier filter with pressure regulator and gauge.
Automatic drain system and regulator with assisted wheel. Double outlet for use two tools simultaneously.
The triple system of filtering retains water and impurities. It incorporates a bronze synthesized filter of 8 microns.

5200

Code 10730304

Bronze filter synthesized of 8 microns + Air purifier filter with coalescent filter (0.01 microns).
It carries out a double filtering with an ideal regulation of flow and pressure, retaining water and impurities, managing to purify the air in 99%.
Automatic drain system and regulator with assisted wheel. Its double outlet allows the use of two tools simultaneously.

5300

Code 10730305

Bronze filter synthesized of 8 microns + Air purifier filter with coalescent filter (0.01 microns) + Active coal of great section
It offers the maximum filtration efficiency in the spray booth with high performance finishing.
Breathable air.

Regulator assisted by Air

Filter elements of high section

Maximum quality of manufacturing in materials and mechanized

Special waterbase paint and HS

Maximum flow 2500 l/min, outlet 2 sprayguns

Maximum softness of working and precision

Maximum quality in the air-filtering

Quick-connectors with stainless steel mechanisms and joints free silicone
